Converting a poster in Canva to an interactive poster in ThingLink

WINDHAM

Saving Your Poster from Canva

1. Make sure your poster is *completely finished* in Canva.

   a. Reminder- This attribution statement should be included in small text at the bottom of the poster: **"All images used in this project are copyright friendly and rights-cleared for educational use."**

2. Click the "Download" button at the top of the screen and select "png" as the file type.

3. As the file is downloading, open a new tab and log into www.ThingLink.com/edu.

Inserting Your Poster into ThingLink to Make It Interactive

1. In ThingLink, click the red "Create" button at the top of the screen.

2. Locate the blue box:

   ⊕ CHOOSE IMAGES OR DRAG-AND-DROP HERE »

3. Drag your downloaded poster onto the blue box or click it to locate and choose your poster.

4. After the poster has uploaded to ThingLink, click on it to add a tag.

   • For each tag, you can link to a photo, video, or website. You can also add text, or upload a photo or audio file.

Remember, the interactive tags need to teach your classmates about your topic!
